

Trinean is a young company that develops, produces and sells instruments for applications in biotechnology. In 2009, Trinean introduced the DropSense instrument, the DropPlates disposables and the DropQuant software in the market : this is a unique and groundbreaking platform for quality control and analysis of small DNA and protein samples. In mid-2011's, the distribution network is installed and the development of a second generation instrument has started.

For the further development of products and to enforce the team, the company is looking for a:

Software Engineer (f/m)

Job description:

As a software engineer you are involved in the entire software development process. You program extensions to DropQuant software, and (with the rest of the team) work on the software architecture, implementation and optimization, test the new software, and you will update the documentation.

Requirements:

- Bachelor (or equivalent by experience).
- Problem-solver: hands-on and practical approach
- Experience with LabView
- Very good knowledge of English

We offer:

- A fixed-term contract (6M) with extensions
- A competitive salary, consisting of a base salary, expense allowance and meal vouchers
- A dynamic work environment where a relatively small team of passionate people, working together in a high-tech environment.
